Councils, Faculty

Discuss Problems

New Council was welcomed into

the fold on Wednesday night at a

dinner for old and new Councils and

To our cut system? Months ago we editorialized on the matter, weeks later Student Council decided to present a specific. plan to the Faculty Committee, the plan was published in the Colonnade, weeks passed, then Council decided to let the students vote on one of four plans, days passed, students voted, weeks have passed-and nothing has been heard of our little cut system since then."

What Has Happened - - -

We are very much in the dark about the whole afafir. In the first place, the students have not the faintest idea what plan the student body as a whole approved of-Plan I, II, III, or IV. And then the mystery arises as to what happened to the plan after it was decided upon. Is the fault with Council in not resenting it to the Faculty Committee? Or is the fault with the Faculty Committee in not considering it?

That little affair happened to be one with which the students were vitally concerned, and it was the general consensus of opinion that if anything was done about it, it should be done by the beginning of Spring Quarter. In the event that the Faculty Committee passed on some form of cut system, it seemed to be the desire of the students for the plan to take effect this yearand not in the middle of a quarter.

Therefore, we say-let some action be taken. And let us know the best or the worst. Also-just as a gentle reminderwe're for it · · · · ·

We Strike Against Overtime

May we take this opportunity to remind over-zealous faculty members that raising of scholarship standards on the campus definitely does not consist of keeping classes five minutes overtime?

There is certainly nothing more provoking than to hear the last bell ring and see that the teacher is seemingly unconscious of the fact, since he goes right on talking at top-speed. Far be it from us to try to tell the august faculty how to run

their class rooms: but this is a matter which concerns us and our convenience. And we than we should.

There isn't a faculty member on this campus who has an eleven o'clock class who hasn't at one time or another registered a protest at chapel running over into his class period. He says in no uncertain terms that it is unwarranted and uncalled for. And that's precisely what we say about having to stay overtime in our classes.

It may be rationalization but it's very, very true that those extra minutes don't mean one single solitary thing to the students, anyhow. When that bell rings, it't all over for them, no matter what goes on in the teacher's mind. So, after all, what's the use?

There's simply no percentage in it, either for the teacher or the student.

Autographs a la Bargain Basement

After giving the matter mature consideration, we have come the conclusion that it isn't a matter if vital importance to any of the students whether the concert artists who appear here use the Palmer or Spencerian method, or whether they are left or right handed. Therefore, our stand on the autograph question is srtictly, definitely, and unalterably this; we're agin it!

In the past the artists have been unusually gracious about giving autographs as a general rule. And also as a general rule, the students have been unusually ill-mannered in their methods of obtaining them. At the end of a performance, the scene backstage resembles strongly a cross between spring football practise and a bargin basement sale. When the horde descende on Ruth St. Denis with their cohorts glearning with pencil and paper, she quailed visibly, but even then tried to make the best of the situation by showing her willingness to give numerous autographs. After a half an hour of continuous writing she was still being shoved about, elbowed, and admonished to "sign mine now" After "mine" was signed, the signee ankled out of the jam at the tremendous rate of speed with a mutter which might or might not have been, "Thank you".

There are many arguments against going after autographs in so determined a fashion, and almost all of them are obvious. In the first place there simply isn't any point in it. Why should one want a hurridly scribbled name of a person who is an utter stranger? If there were a link of friendship of even of short acquaintance between the artist and the students there would be some reason for the frantic search for autographs. In the second place, if several students start after autographs in an orderly manner, it always results in just another mob scene. Instead of stating the other twenty-five arguments against autographs-seeking, let it sufice to say: "Let's not get involved in

any more autograph mobs."

Why Put Student Teachers on The Spot?

Let us say without further ado that we are grateful for the opportunity of coming to college, that we consider it a marvelous chance to do actual teaching in getting our training for the teaching profession, and that the idea of the Practice School is a brilliant one. Let us utter all the old platitudes that if a thing is worth doing it is worth doing well and so forth. And then let us proceed from thence.

Spring holidays begin officially on March 18 and supposedcontinue up to March 24-Thursday of the following week. Classes will begin on Friday, March 25-for everybody except the student teachers. They, out of the whole student body, have to return early. By early, we don't mean just a day or two either. They are not only expected, but are required, to return to the campus in time to begin teaching on Tuesday, March 22, which means that they will have to come back to the campus on Monday and they are expected to be grateful that they get a whole week end for Spring Holidays.

That is a dirty deal. We may be eager to learn to teach, and all that, but that's carrying matters just a little too far. The girls who will return three days ahead of time in all prohability
