MILLEDGEVILLE, GEORGIA

NATIONAL GEOGRAPHIC WILL **Publicize GSCW, And Milledgeville**

By SHIRLEY LAGERBLAD

There was a great deal of excitement out on front campus last Tuesday. The reason was Mr. Howell Walker and his camera. Mr. Walker is a photographer and reporter for the NATIONAL GEOGRAPHIC magazine, and he is now working on a story about Georgia which will include pictures and anecdotes about GSCW and the University.

Mr. Walker visited Milledgeville April 6 to tour and make pictures of the lovely old homes and gardens included in the Pilgrimage tour. He also attended the Secession Convention Pageant enacted at the Old Capitol building Amazed by the versatility of this charming southern town, he decided to stay over a few more days and learn more about Milledgeville.

Accompanied by Dr. Bonner, biggest and brightest smile for Mr. Walker spent a very busy day Mr. Walker.

1.

Some place along the line all of us achieved the distinction of becoming college students. The whys and wherefores of the college careers of slightly more than a minority of us remain unanswered. No dramatic question follows concerning one's ultimate goal, only a point that has come up in not enough bull sessions around campus: What is the difference between general education and a more specific training and what values do the two have?

Training is the acquisition of a skill; education amounts to acquiring the wisdom and insight to choose valid values and, with these as a basis, be able to live the "good life" on a high cultural, intellectual, and moral plane. Without education, training falls into the pattern of goal without pur pose-the striving for materialistic goods; with education as a basis, training can and should be used as a means to the end.

You now ask, with very good reason, how one goes about becoming educated. Well, it isn't listed in the college catalogue, and they don't charge any more for it when you matriculate; it's just one of those intangibles that you can't quite put your finger on. It isn't directly taught by anyone, just as no one can teach anyone else to appreciate music; but almost anyone who spends a great deal of time around good music will learn to appreciate it (assuming that he or she isn't tone-deaf). The same idea holds for learning to appreciate the values and ideas that make up education; if you are around them for any length of time and allow yourself to work and think with them, they begin to assume importance. Through classes, good books, and movies, concerts, bull sessions, and just being around people, you can begin to assimilate these ideas.

Then you're really stuck. With a little educa human rules and regulations. tion comes dissastisfaction: Dissatisfaction because you've waited so long to begin thinking, and dissatisall the facts--"

Yankee Overwhelmed Bv South's Sudden Spring

It's spring in the South So the Dogwoods tell, Back home, it's still As cold as usual.

Last Spring, my first in the South, found me frowning at the flower beds in Terrell Court and in the back of Atkinson. I was frowning because t was only February and I was struggling with wild urge to shake my fist at the flowers and tell them in the scolding tone of a northern mother stuffing her reluctant child into leggings, "Don't you know its only February. Blooming in February You're blooming idiots that's what you are. Do you want to freeze to death?"

But the months rolled by and I gave up the task of trying to count the different varieties of flowers, trees, and shrubs that were rapidly turning the it offers a program of revitalizing activities for its campus into a scene out of a color travelogue. Spring is an adolescent, young, wild and beautiful—amazed and thrilled by i ts own beauty. It will grow and mature into summer, and you almost hate to see it grow-as a mother hates to realize that her son or daughter is growing into a self-reliant adult.

I'd know it is Spring even without the evidences of flowers and young, green leaves—just try to ind an empty bench on front campus any weekend evening. I knew it when I saw a group of high school students here for the music festivaltwo girls walking down the street diligently blowing soap bubbles and two boys just as diligently shooting the bubbles with squirt guns as fast as the girls could blow them.

Y Week Set For April 22-29

Next week, April 22 to 29, the Young Women's Christian Associations throughout the country observe their fifth annual National YWCA Week. At GSCW and in hundreds of other communities in the nation, over three million YWCA members will celebrate this annual observance with an intensive membership drive built around the slogan "On your own-but not alone-Join the YWCA."

The slogan expresses the YWCA's philosophy in relation to the young women and girls with whom t works-the belief in the right of every individual a to be himself, respect for the dignity of each personality, and the assurance of fellowship with others who work together for the common good.

Founded in 1855 as a "ladies prayer circle to pray for and guide the working girls away from home," the YWCA in the nearly 100 years since, has grown into an international organization with a program designed to meet the needs of women and girls from 13 to 35.
