Mr. Meyer has just recently talked to a professional decorator who could imagine the SU looking thus: A lower ceiling could be effected by dropping from the ceiling various shaped - oblong, rectangular, cuboidal - "objects" which would contain the lights. The ceiling itself could be painted midnight blue. Perhaps the eating area might contain a plush rug with only a relatively smaller place bare for dancing. In place of booths, there might be various groupings around, in such a manner that a long seat or bench would be stationary and one could push the table away or near as one pleases. The genuis of Mendelssohn achieved a more dramatic style than oratorio had known before.

The text of "Elijah" is compiled largely from the Old Testament The main scenes portrayed in the oratorio are the drought prophecy. the raising of the wi dow's son, the rival sacrifices, the appearance of the rain in answer to Elijah's prayer, Jezebel's persecution of of Elijah, his sojourn in the desert, his return, and his disappearance in the chariot of fire.

The first part begins with Elijah's prophecy of drought which is followed by the overture depicting the distress about to result from the awful prophecy. Then the suffering of the people is voiced in the opening chorus. The voice of an angel summons Elijah and then comes the dramatic scene of the raising of the widow's son.

In the next section Elijah appears before King Ahab and calls down the fire from heaven; An orchestral climax represents the deluge of rain and a passionate chorus concludes this part.

The ABC's Of Job Hunting

So, the Great Adventure lies tween past training or experience before you — finding the right and relate to job desired.

career. You've left the campus behind you, whether it be permanently or just for a summer job.

You're "in the market now" forearmed with the experiences and knowledge gained in school to help you meet the "outside world". Now, no matter how the job begins, you're ready to put your classroom knowledge into actual every-day working practiçe.

How do you go about finding the right job? Where do you start? What can you offer? Remember, to begin with, finding a job is an experience common virtually to everyone. With proper planning you need not become a "jumping jack" from one job to another. If you know what to expect from prospective employers and how to meet their needs you'll find you can become profitably employed in the field of your true choice and grow in it contributing both to your job and to yourself.

Now, is there an "art" to jobseeking? Yes, there is a method, - It takes systematic and organized effort.
