First of all, the most of business is now more friendly to the present generation than ever before. This is true in every family and every shop, from the smallest to the largest. The tendency is to be more friendly, not only to the people who are not in the trade, but to the people who are in it. This is a fact, and it is one that is constantly being recognized by those who are in the trade.

One of our first employers was a man who was in business and was greatly interested in the town. He sold his goods at a loss in the trade, and he was always willing to buy his goods at a bargain. He was a model employer, and he was as much interested in the welfare of his employees as in the welfare of his business. He was a man who was always ready to help his employees when they were in need. He was a man who was always willing to help his employees when they were in need.

The town of Sheeps farm is famous for its sheep. The town has a large number of sheep, and the people who are in the trade are always ready to help the people who are in the trade.
