You and Scientist to Relation Wonders of Ocean Depths

Colleger and Scientist to Relation Wonders of Ocean Depths

Dr. William Beebe, the diving scientist who electrified the world with his descent to the depths of 362 feet in the waters off Bermuda's, has bequeathed his experience to the world. Beebe's ideas have been studied and reported on by Dr. Beebe, a number of years ago. The scientist, feeling that the last great unexplored portion of the earth's surface was the ocean floor, has become interested in the world under the waves. When he announced his first attempt to submerge, his effort was met with ridicule and derision. Dr. Beebe, an engineer, was able to secure the cooperation of a number of experts and mysteries of the fabled Bermuda. From that time until now, his underwater activities have been controlled by the United States Navy and the American press. These events in a small boat to depths never previously explored, have stirred the imagination of people in this country and in Europe. Man has challenged nature in every other element. William Beebe was first to open the realms of Father Neptune. These books which he wrote about his underwater exploits are as few few of literature as his jungle essays. "No Man Under Water" is one of them. This new book, "No Man Under Water" is one of them. This new book, "No Man Under Water" is one of them. This new book, "No Man Under Water" is one of them. As a matter of fact, the girls have been taking a bigger part in campus activities.

The first football game of the season was played on Friday evening, and the girls were given a very pleasant surprise. After taking the right entrance, they were entertained to a very fine spread of food which was prepared by the students. The girls, who were present in large numbers, were very much pleased with the way the game was managed.

The girls have been taking a bigger part in campus activities, and this trend is expected to continue. One of Miss Burditt’s education classes had a borrowing experience the other day. She suddenly announced that they would all take out pencils for their midterm exams. After quite a debate, Miss Burditt was convinced that the date was October 14, and not November 4. The freshmen are still wondering if she was trying to tease them, or whether she was seriously mistaken.

Telling it. Especially those people who remain in the telephone booth, when someone comes in to make a call. The considerate thing to do would be to quietly go outside until the person has finished talking (just in case there are those who do not know about consideration).
