GSCW Ranked With Other Colleges

On Grades, Degrees, Instructors

Where does GSCW stand in rank with other colleges for the question of grades? What is the comparison of the degrees of the instructors? What do the students say about the instructors? How many degrees do we grant each year?

These are some of the questions that have been answered on our campus during the past year. The differences in grading of college courses and in the number of degrees granted by different colleges vary from state to state. A complete list of the degrees granted by each college in the state can be found in the state's higher education report.

Sample:

A college's level, location, and faculty determine the types of degrees it grants. For example, a college with a strong engineering program may grant more engineering degrees than a college with a strong arts and sciences program.
