Spring Enrollment Is Up 11 Percent

Over Past Quarter

Registration this quarter is up 11 percent over last quarter and 4 percent over the 1949 figures. According to the statement by a representative of the registrar's office, the number of women in colleges is up 11 percent.

Dr. T. R. Smith, registrar, reports that there are almost 100 more students here now than there were registered for the winter quarter and almost 60 more than at this time last year. Yet the trend continues to move in the other direction in the majority of the colleges.

Judge Lucer Somerville Howorth, correspondent general of the War Claims Commission, speaking last week before the National Association of Deans of Women in Chicago, declared there are fewer women in colleges now than there were in 1930.

Dr. Howorth, who attended the conference, says that Judge Howorth is of the opinion that it is a misunderstanding about the number of women to be found in the loss in women students.

Judge Howorth pointed out that in the past girls were supposed to represent national ratio of 1.8 women for every man throughout the population, when actually it is 1.2. In the college groups, therefore, high school girls are missing, which is that they feel that they have better things to do with their time to plan careers for themselves. The truth is that since America's goal is 3.0.

President Wells is particularly pleased with GSCW's enrollment increase and points out that the trend throughout this entire year has been one of addition instead of subtraction, despite much publicity to the contrary.
