This is not something I should have to explain. I have lived through two rule changes and this is not my opinion; it is everyone's. And everyone is concerned about it. And this rule change is not only a problem for us, but it is a problem for all of us.

It is a self-policing system that is designed to keep our schools safe and our students healthy. It is not about winning or losing. It is about doing the right thing.

For the past few weeks, I have been hearing from parents, students, and teachers about the negative impact of these rule changes. They are concerned about the safety of their children, and they are concerned about the quality of their education. They want to see their children thriving, not just surviving.

I want to assure everyone that we are doing everything we can to address these concerns. We are working with the school board to make changes to the rule changes. We are also working with the state to ensure that our schools have the resources they need to support our students.

I want to hear from you. What do you think about these rule changes? What changes do you think we need to make? Please let me know your thoughts.

Sincerely,
[Your Name]
